

## **Celebrating Staff - ZuVuYah**

### **1. You seem really excited about where the PAFAC is going. Tell me more about that?**

I am thrilled about the inspired, highly creative energy that is being put into blossoming our precious PAFAC! I especially appreciate the resourceful, inventive strategies you have brought in light of the pandemic! Our community has a golden opportunity to be involved and nourished while remaining home and safe. As a kinesthetic person, however, I am so glad to be able to come to the Arts Center and be in the presence of the artwork... I also commend you on your inclusivity... coming up with activities for all ages! In my opinion, children need to be exposed to the art world if they are to grow up and appreciate the arts...

### **2. What do you appreciate about the community you have found at the PAFAC?**

Getting to meet others who share a love of the arts is so much fun! We are all so different yet find this common ground to share and take delight in! I would say also that since this is a small town, our Arts Center is more personal. If we were in a big city, not sure how connected I would feel.... for example, SAM in Seattle is GORGEOUS yet I definitely feel like part of a nameless herd.

### **3. What would you like to see more of—where can we turn up the volume?**

A more expanded gift shop—I personally enjoy coming to look for a gift that is more local to where I live... and when we are able to gather again, maybe we could have a local restaurant featured at openings!
